EDUCATION

Vellore Institute of Technology, Bhopal

Bachelor of Technology in Computer Science and Engineering (Cyber Security)

Sep 2023 – May 2027

CGPA: 8.88

Sanskar Public School, India

Higher Secondary Education (Class XII)

Apr 2020 – Mar 2022

88%

Happy Days School, India

Secondary Education (Class X)

Apr 2018 – Mar 2020

86.4%

EXPERIENCE

Techniki IT Solutions

SOC L1 Intern

May 2026 – Present

Firozabad, India

- Monitored and triaged 30+ security alerts weekly using SIEM tools, assisting in early detection of phishing and malware incidents.
- Performed incident triage and root cause analysis for phishing, malware, and suspicious activity alerts following SOC workflows.
- Conducted vulnerability assessments and threat monitoring activities to identify potential security risks and improve security posture.
- Created detailed incident reports, documented findings, and tracked remediation efforts to support security operations and compliance requirements.

The Red Users

Cyber Security Intern

Feb 2025 – Mar 2025

Remote

- Analyzed network traffic patterns and security events to identify potential threats and unauthorized activities.
- Utilized Wireshark for packet analysis, protocol inspection, and network troubleshooting during security investigations.
- Conducted web application security assessments aligned with OWASP Top 10 methodologies to identify common vulnerabilities.
- Discovered and validated security weaknesses including SQL Injection, Cross-Site Scripting (XSS), and Cross-Site Request Forgery (CSRF).
- Prepared vulnerability assessment reports with risk prioritization and actionable remediation recommendations.

PROJECTS

Employee Attrition Prediction — Python, Pandas, Scikit-Learn

GitHub

- Developed predictive machine learning models using HR analytics datasets to identify employee attrition patterns.
- Implemented and evaluated Logistic Regression and Random Forest algorithms for workforce retention analysis.

Feistel Cipher Simulation — C Programming, Cryptography

GitHub

- Designed and implemented a multi-round Feistel Cipher algorithm in C for secure encryption and decryption.
- Demonstrated practical understanding of symmetric-key cryptography, block cipher architecture, and data confidentiality principles.

Phishing Website Detection — Python, CSS, HTML, JS

GitHub

- Built a rule-based phishing detection system with **80% overall accuracy** (100% website detection, 60% email detection).
- Developed dual-mode analysis: email content checker and website URL/HTML scanner using transparent heuristics.

CERTIFICATIONS

- Microsoft Student SOC Program Foundations Training (Dec 2025)
- Cyber Security: From Beginner To Expert – Udemy (May 2026)
- Deloitte Australia Cyber Job Simulation – Forage (Dec 2025)
- The Bits and Bytes of Computer Networking – Coursera (Dec 2025)

SKILLS

- Languages:** C, C++, Python, Java, JavaScript, SQL, HTML, CSS
- Frameworks:** React.js, Node.js, Express.js, Tailwind CSS
- Cyber Security:** SOC Monitoring, SIEM, Incident Response, Threat Analysis, Threat Hunting, Vulnerability Assessment, Vulnerability Management, OWASP Top 10, Network Security, Log Analysis, Security Monitoring, Phishing Analysis, Wireshark
- Tools:** Git, GitHub, Linux, VS Code, Node.js
- Academic Subjects:** OOPS, DBMS, Operating Systems, Computer Networks (TCP/IP), OWASP Top 10

EXTRA-CURRICULAR

- Core Member, Design Team — Edu4U Club
- Volunteer, Discipline Team — Advitya'25
- Volunteer, Discipline Team — Advitya'26
